POWERFUL, PORTABLE, AFFORDABLE COMBUSTIBLE GAS LEAK DETECTOR

ST. CHARLES – Nova Systems, Ltd. is offering the Pocket Air Check® portable gas leak detector, the newest addition to Nova's line of gas detection instruments. The Pocket Air Check® is a pocket-sized, battery-operated, solid-state instrument intended for use in applications required pinpoint detection of combustible gas leaks.

The Pocket Air Check® measures 6-1/4" x 1-3/8" x 3/4" and weighs approximately 3 ounces. Its highly sensitive solid-state sensor detects natural gas, propane, hydrogen, butane and more, locating leaks in pipes, valves, fittings and tanks. The instrument provides both audible and visual alarms, and operates up to 8 hours on 2 AA batteries.

The Pocket Air Check portable gas leak detector is a very affordable, highly effective gas leak detection instrument that will help insure the safety and security of residential and commercial gas installations, and does the same job as gas sensors costing hundreds of dollars more.

NACHI members enjoy a 7% discount from MSRP when they purchase direct from Nova Systems, Ltd. For additional information about this product, as well as the complete line of Nova Systems, Ltd. gas sensors, please call toll-free 866-734-0200, or direct 630-513-0500, or email to dbooty@nsl1.com
